If you need tighter locking,
moisturize parts before assembling
to ensure good adhesion!
Щоб кріплення пазів були
міцнішими, зволож деталі водою!

A 3D rendering of a wooden tractor model, labeled 'Tractor' in green text. The tractor is constructed from light-colored wood blocks and features a large, flat wooden board as a ramp or wheel. The background is a solid light yellow.

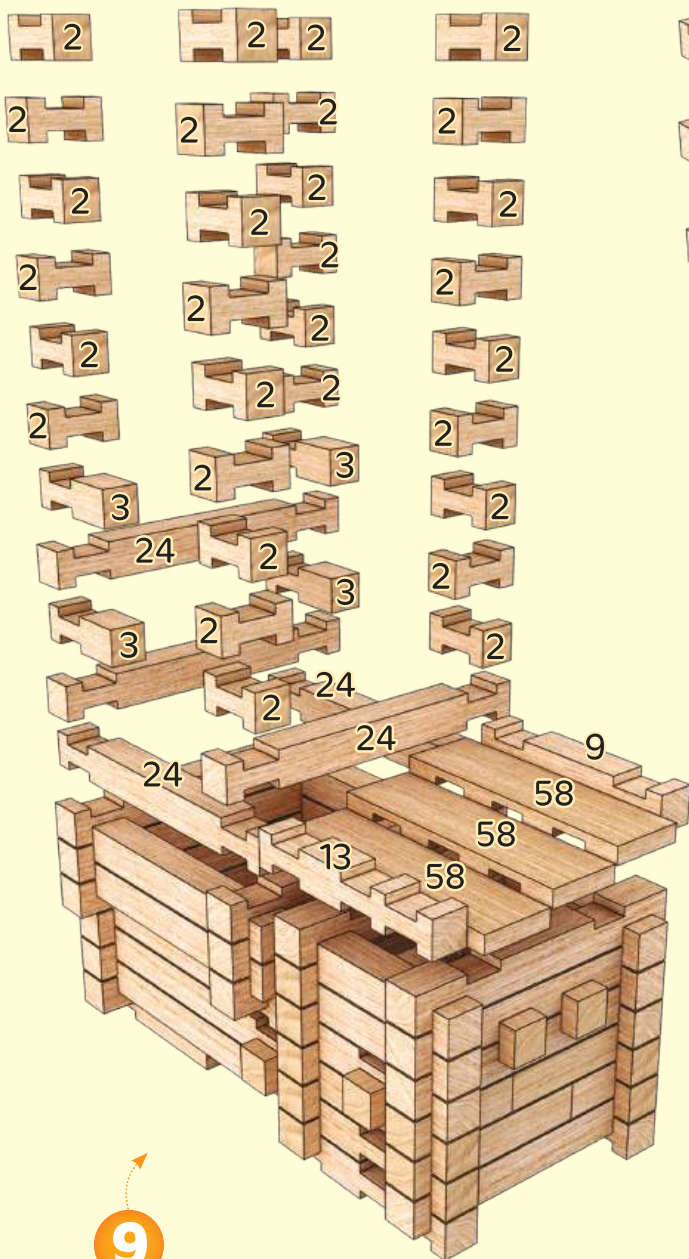

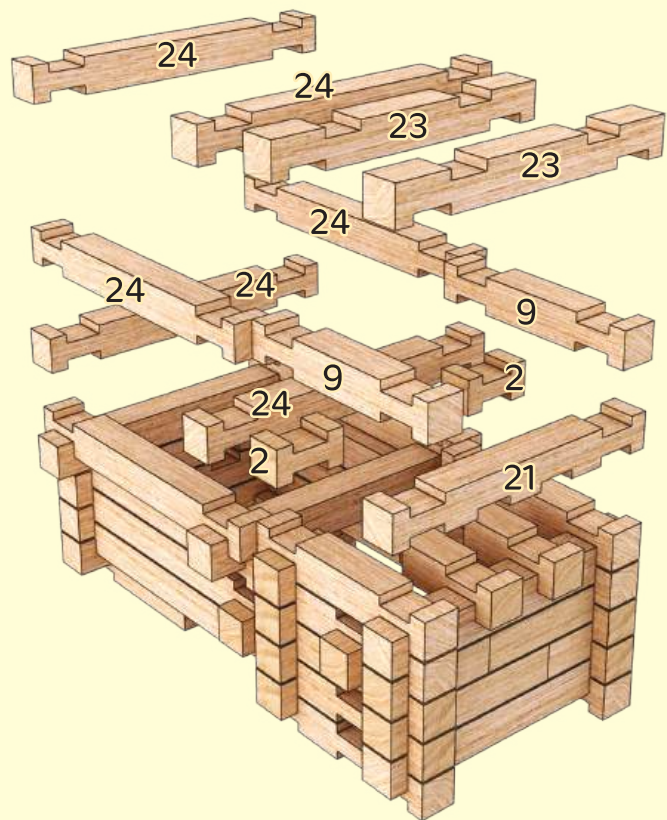

A 3D exploded view of a wooden puzzle assembly. The pieces are numbered as follows: 19 (long horizontal bars), 1 (small rectangular blocks), 2 (L-shaped connectors), 12 (vertical bars with notches), and 50 (a long central bar). The pieces are arranged in a way that shows how they fit together to form a complex structure.

Diagram illustrating Step 2: Connecting the two frames. A long wooden beam is being inserted into the central slot of the right-hand frame, which is already partially assembled. The left-hand frame is shown separately, indicating it will be connected to the right-hand frame.
